

NovaFount FS-501

Sheetfed Fountain Solution

Description

NovaFount FS-501 is a sheetfed fountain solution.

Directions

Use two to three percent solution for best results.

Product Need and Usage

NovaFount FS-501 is a fountain solution specially formulated for the needs of sheetfed printers. It contains ingredients designed to stimulate the drying of sheetfed inks and to sequester and remove calcium from the printing process. Special ingredients help to prevent the build-up of ink on the impression cylinders and to maintain a stable pH. This product is formulated to be compatible with a wide variety of inks and substrates.

Features

- * Stimulates the drying of sheetfed inks.
- * Sequesters and removes calcium from the printing process.
- * Helps prevent the build-up of ink on the impression cylinders.
- * Maintains a stable pH.
- * Compatible with a wide variety of inks and substrates.
