

# NovaFount FS-502

*Sheetfed Fountain Solution*

## Description

NovaFount FS-502 is a mild acid fountain solution for sheetfed printing.

## Directions

Mix one half to two percent concentrate with water. A starting conductivity of 1000 to 1500 over the conductivity of the water is suggested. The working pH will be between 4.8 and 5.3 depending on the hardness content of your water.

## Product Need and Usage

NovaFount FS-502 is a fountain solution specially formulated for the needs of sheetfed printers. It contains ingredients designed to provide fast starts while being non-corrosive to press parts. It also contains a strong desensitizer. NovaFount FS-502 is compatible with all sheetfed inks.

## Features

- \* Provides fast starts.
- \* Non-corrosive to press parts.
- \* A strong desensitizer.
- \* Compatible with all sheetfed inks.

## Technical Specifications

VOC (lb/gal method 24)	0.00
Specific Gravity	1.147
pH	4.75
Dosage	0.5% to 2%
Color	Blue
