

NovaFount FS-705R

Acid Fountain Solution

Description

NovaFount FS-705R is an acid fountain solution for high quality, high speed lithography.

Directions

Use five to seven ounces per gallon of water as needed. Conductivity will be 360 mmhos per ounce used over the conductivity of the water. A starting concentration of six ounces per gallon is suggested.

Product Need and Usage

Formulated especially for HydroMix, Epic, and other high friction Dampening systems, FS-705R offers a high concentration of non-piling and lubricant ingredients along with excellent desensitizing and plate protection. Contains corrosion inhibitors meeting FOGRA requirements.

Features

- * Provides fast starts.
- * Non-corrosive to press parts.
- * Reduces blanket piling.
- * A strong desensitizer.
- * Buffered at pH 4.8.

Technical Specifications

VOC (lb/gal method 24)	2.50
Specific Gravity	1.035
pH	4.8
Dosage	5 to 7 oz./gal.
Color	Green
