

N-105

Metering Roller Cleaner / Fast-Dry Blanket and Roller Wash

Description

Nova N-105 is a fast-drying solvent blend, formulated to clean metering rollers in continuous dampening systems. Regular blanket and roller washes may leave a residue on the roller surface that will interfere with their operation. N-105 will clean quickly and evaporate quickly, leaving no residue. For the quick printer N-105 serves double duty as a mild fast drying blanket and roller wash.

Directions

Metering Roller: Disengage the metering roller from contact with other rollers and wipe clean with a cloth saturated with N-105. Rollers that have been neglected in the past will require a thorough scrubbing. The metering roller should be cleaned daily at the end of the shift or when ever a build-up of ink appears.

Product Need and Usage

Continuous dampening systems depend on the smooth surface of the metering roller to ensure uniform dampening of the plate and to prevent streaking in the solids and screens. N-105 is ideal for cleaning all rollers in the dampening system, leaving them clean and free of any ink or resin build-up that can promote ink feedback into the dampening system.

Features

- * Non-photochemically reactive.
- * Controlled drying rate.
- * Non-damaging.
- * Cleans metering rollers without damage to rubber.
- * Does not contain any aromatic or chlorinated solvents.

Technical Specifications

Drying Speed	Very Fast
Water-Miscible	No
Flash Point (°F TCC)	10
VOC (lb/gal method 24)	5.91
Vapor Pressure (mm HG)	37
Odor/Fragrance	Mild / Citrus
