

## N-2120 Renew

*Recycle Blend Concentrate for N-210 / N-220 / N-282*

### Description

N-2120 Renew is the recycle blend concentrate for Nova N-210, N-220 or N-282 blanket and roller washes. It contains the surfactant additives, fragrance and solvent booster that when added back to the recycled solvent will return it to the same cleaning performance and water-miscibility as the original product.

### Directions

For use with recycled N-210, N-220, or N-282 blanket and roller washes. Blend in N-2120 Renew to the recycled solvent at the rate of 5% by volume (2.5 gal. to 47.5 gal. recycled solvent).

### Product Need and Usage

The use of solvent distillation recycling systems is one way printers can reduce solvent waste and blanket and roller wash costs. The recycled solvent however will not contain some of the key components that were in the "virgin" blanket and roller wash. N-2120 Renew will return recycled Nova N-210, N-220, or N-282 back to near original quality.

### Features

- \* Returns recycled solvent to high quality blanket wash.
- \* Contains original surfactant and fragrance for N-210/N-220/N-282.
- \* Use with recycled solvent can reduce waste disposal cost.
- \* Use with recycled solvent can cut blanket wash cost in half.

### Technical Specifications

Drying Speed	NA
Water-Miscible	Yes
Flash Point (°F TCC)	117
VOC (lb/gal method 24)	2.45
Vapor Pressure (mm HG)	1
Odor/Fragrance	Sweet

Rev. 9/20/2008
