

N-218

Water-Miscible Blanket and Roller Wash for Sheetfed and Web

Description

Nova N-218 is a water-miscible blanket and roller wash for use on sheetfed and web presses. It is formulated with no aromatic hydrocarbon content and is therefore mild and friendly to use. The water-miscible characteristics actually improve ink-cutting power and rinsability, aiding in the elimination of harmful residues.

Product Need and Usage

In a blanket and roller wash, the printer is looking for a wash that will remove ink, paper, coatings and other contaminants quickly and easily. They want a product that is friendly and economical to use, is compatible with press elastomers and equipment, and compliant with environmental regulations. N-218 contains no aromatic hydrocarbon and is compliant for use in states with that restriction.

Directions

Blankets: Apply N-218 to a water-dampened cloth, wipe blanket until ink is removed. For best results, follow with a water-dampened cloth to remove all residual contaminants. Alternately, add 20% to 50% water to N-218 wash in a wash-up bottle. Shake well before using.

Rollers: Apply N-218 directly to rollers, engage wash-up blade, allow ink to run off and repeat until ink is removed. Finish with a water rinse to remove all residues.

Automatic Blanket or Roller Washers: Follow manufacturer's instructions.

Features

- * Excellent cleaning and user-friendly.
- * Water-miscible.
- * Mild citrus odor.
- * Non-damaging to rollers and blankets.

Technical Specifications

Drying Speed	Medium
Water-Miscible	Yes
Flash Point (°F TCC)	105
VOC (lb/gal method 24)	6.40
Vapor Pressure (mm HG)	2.5
Odor/Fragrance	Mild Solvent/Citrus
