

N-271

Step One Wash Extra

Description

N-271 Step One Wash Extra is a special emulsion of solvents, emulsifiers and water, designed to deep clean ink and press contaminants from ink train rollers. N-271 should be used in conjunction with Nova N-272 Step 2 Wash, as the step two, to thoroughly rinse wash and residue from the rollers.

Directions

Apply N-271 Step One Wash to the ink roller train, allow it to run in for several minutes, and engage the wash-up blade. When ink is removed, disengage the wash-up blade and repeat the process. Apply N-272 Step 2 Wash as a final wash/rinse step, until N-271 is removed and rollers are thoroughly clean.

Product Need and Usage

N-271 Step One Wash Extra is recommended for thorough wash-up between color changes, or for regular periodic roller wash-up to thoroughly remove ink, surfactants and build-up of contaminants. Regular use of N-271 with N-272 Step 2 Wash will keep rollers in tip-top form for optimum ink transfer properties.

Features

- * Deep cleans for ink color changes.
- * Removes surfactants and built-up contaminants.
- * Safe for nitrile and composite rollers.
- * Low odor, user-friendly formula.

Technical Specifications

Drying Speed	Slow
Water-Miscible	Yes
Flash Point (°F TCC)	107
VOC (lb/gal method 24)	5.30
Vapor Pressure (mm HG)	2
Odor/Fragrance	Mild Solvent
