

N-303

Blanket and Roller Wash for Large Presses

Description

Nova N-303 is an economical, all-day press wash for the quick, reliable and effective removal of soft ink. It contains no aromatic hydrocarbons for a high level of regulatory compliance. It has been formulated for use on web presses and to meet the standards specified for manroland and KBA sheetfed presses. It is not water-miscible and has fast separation properties to be compatible with the Technotrans Ecoclean System.

Product Need and Usage

N-303 is a clear, light colored liquid with a very mild odor. It has a flash point of 142°F and contains no aromatic hydrocarbons. It meets all European Community specifications for health and safety.

Directions

Blankets: N-303 is not water-miscible, but may be used with or without water to clean blankets and rollers. Remove surface ink using a cloth saturated with N-303. Wipe clean with a dry cloth. To use with water, dampen a cloth with water and N-303, then apply to the blanket. Wipe clean with a dry cloth. For rollers, follow a similar pattern as on the blanket.
Rollers: Apply N-303 to top of roller train and allow to run in a few minutes. Engage the wash up blade, and repeat application of N-303 until rollers appear clean. For a badly glazed roller, use a glaze remove in conjunction with N-303 to remove the ink and gum glaze.

Features

- * Recommended for use with Solvent Recovery Systems requiring good water separation.
- * Contains corrosion inhibitor to protect equipment.
- * Very low odor and will not irritate skin or eyes.
- * Low volatility decreases exposure to vapors and reduces usage.
- * Controlled drying; means better cleaning and less wash-ups. Leaves no oily residue.
- * No blanket or roller hardening or swelling.

Technical Specifications

Drying Speed	Slow
Water-Miscible	No
Flash Point (°F TCC)	145
VOC (lb/gal method 24)	6.50
Vapor Pressure (mm HG)	0.5
Odor/Fragrance	Mild
