

**N-4065**

**Rule 1171 Conventional and UV Wash**

**DESCRIPTION**

N-4065 is a one of a kind user friendly ultra low VOC press wash, containing less than 100 g/l VOC. It is the primary recommended product for roller wash on sheet-fed and web presses without catalytic converters. N-4065 is recommended to mix 75/25 with water. It utilizes VOC exempt solvents along with a special blend of emulsifiers that quickly flush ink from the roller train. N-4065 will also work excellent as a slower drying blanket wash.

**PRODUCT NEED AND USAGE**

N-4065 meets the requirements for SCAQMD Rule 1171. It is also recommended for the printer trying to achieve "GREEN" status or needing to reduce VOCs for air permitting. N-4065 is suitable for use by hand application for sheet-fed and web presses and can be used in automatic wash systems at the users discretion. It will also clean UV ink and is compatible with UV nitrile composite rubber compounds.

**FEATURES**

- Exceptional Cleaning and Drying.
- Compatible for automatic wash systems.
- Cal Rule 1171 compliant.
- Contains no acetone or water.
- Excellent rinsing properties.

**SPECIFICATIONS**

Flash Point: 125°F  
VOC (lbs./gal.): 0.8  
Composite Vapor Pressure (mm HG): 0.01  
Cleaning Strength: Medium  
Drying Speed: Medium

**DIRECTIONS**

**Blankets** – FOR BEST RESULTS, MIX N-4065 WITH 25% WATER. Apply with shop cloth and wipe to remove ink and piling. Use of a water dampened cloth to follow is optional to remove all residue.

**Rollers**- MIX WITH 25% WATER. Apply N-4065/water to top roller and allow it to circulate. Engage wash up blade and repeat small applications. Finish with a few applications of water.

N-4065 has not been certified for use in automatic blanket and roller wash systems.

**NOT FOR USE WITH CATALYTIC CONVERTERS**

Rev. 10/31/2014
