

NEW CORPORATE HEADQUARTERS

NOVA Pressroom Products LLC has moved the Corporate Headquarters and Customer Call Center to the site of its Manufacturing and Research Center in Jacksonville, Florida. All marketing, sales and operations have been consolidated in a new 2,200 square foot facility adjacent to the plant.

“We believe bringing the business operation to the same campus with manufacturing and research will allow for more efficiencies as we continue to grow,” stated Ron Rose, President of NOVA Pressroom Products. “We continue to be honored by the enthusiastic support of our customers as we work to achieve our goal of becoming a major supplier of safe, cost-effective and environmentally-compliant pressroom products.”

New Address **1663 North McDuff Avenue
Jacksonville FL 32254**

Mailing Address **PO Box 2700

NEW SPECIALTY PRODUCTS

SP-526 Calcium Remover is a cleaner for the build-up of calcium salts on ink rollers. It is fast, complete, and safe when used as directed. SP-526 contains wetting agents to provide optimum roller coverage without any slinging. Regular use is recommended to prevent excessive accumulation of calcium in the ink train. Supplied in quarts and gallon sizes.

SP-531 Command-Clean is a ready to use industrial strength spray cleaner to remove ink, grease and grime for use on most hard surfaces such as vinyl, rubber, plastic, metal, ceramic and painted surfaces. It is ideal for use on press side frames, walls, bindery equipment, plate cylinders and general cleaning in the pressroom, prepress, bathrooms and kitchens. Supplied in quart bottles with trigger sprayer.

MORE NEW NOVA PRODUCTS

N-444 – 50% (3.5lbs./gal. VOC) water emulsion blanket and roller wash. It is designed to replace Day/Varn Ecolo-Clean 35 which has recently been discontinued. The Nova N-444 is a similar emulsion wash product that should easily substitute for this. It is available now. The Product Data Sheet and MSDS are available on the web site. Contact Ray Brady if you have questions or need any assistance.

NovaCoat AQ-633 – NovaCoat AQ-633 is an ultra-fast drying aqueous coating designed for sheetfed coaters. NovaCoat AQ-633 has excellent flexibility, adhesion to non-porous substrates, dry speed and non-blocking character. NovaCoat AQ-633 has low odor and low VOC and adequate gloss, is slippery and is not recommended to be recoated.

Printers who are battling blocking or rub/scuff issues, have short delivery/insufficient drying capacity, or coat over non-porous substrates, including synthetic papers or plastics should try NovaCoat AQ-633. Please call customer service for MSDS, TDS or samples. For technical questions, call Chuck Malspeis at 904-292-2554.
