

# SP-170

## VOC Compliant Metering Roller Cleaner and Press Wash

### Description

SP-170 is a reduced VOC MRC that is compliant with new state VOC regulations. It is fast-drying and leaves no oily residues on metering rollers. SP-170 is also excellent as a compliant presswash for small presses. Cleans UV and conventional ink. Recommended for nitrile and UV composite rubber compounds.

### Directions

Metering Rollers: While press is stopped, apply to the metering roller with a shop cloth and wipe clean.  
Blankets: Apply SP-170 with a shop cloth and clean blankets with a back and forth motion in the usual manner.  
Rollers: For small presses, apply a liberal amount to rollers, engage the wash-up blade and repeat application until rollers are clean.

### Product Need and Usage

State EPAs are required to review air quality and where necessary, implement product VOC restrictions for press wash and fountain solutions for offset printing. Most states have followed a 70% VOC maximum for products with vapor pressures >10mm Hg. SP-170 VOC Compliant MRC is the answer for this requirement and remains a friendly compatible metering roller cleaner and small press wash.

### Features

- \* Compliant with new state EPA VOC regulations.
- \* Excellent metering roller cleaner / small press wash.
- \* Fast drying VOC exempt solvents.
- \* Leaves no oily residue.
- \* Does not require rinsing.
- \* Cleans UV and conventional ink.

### Technical Specifications

Flash Point (TCC)	4 F
VOC (lb/gal method 24)	4.15
Specific Gravity	0.745
Water-Miscible	No
Color	Colorless
Odor/Fragrance	Medium/Sweet
