

SP-525

Anti-Foam

Description

SP-525 Anti-Foam is a ready-to use solution formulated for direct use in fountain solution circulation tanks.

Directions

Shake the bottle of SP-525 Anti-Foam to insure consistency. Using the trigger sprayer supplied, spray the surface of the foam lightly. The foam should rapidly dissipate. Use only enough SP-525 to reduce the foam to an acceptable low level.

Product Need and Usage

Fountain solution tanks can often collect contaminants from other sources such as blanket wash, plate cleaners, press cleaners and fountain additives which may cause excessive foaming with the agitation from the circulation pumps. A few sprays of SP-525 Anti-Foam on the foam and liquid surface will eliminate the foam.

Features

- * Quickly eliminates foam.
- * Compatible with fountain chemistries.
- * A little goes a long way.
- * Available in quart bottles with trigger sprayer and gallons.

Technical Specifications

Flash Point (°F TCC)	>200
VOC (lb/gal method 24)	0.00
Specific Gravity	1.00
Water-Miscible	No
Color	White
Odor/Fragrance	None
