

SP-529

Plate Cleaner / Desensitizer

Description

SP-529 Plate Cleaner / Desensitizer is a multi-purpose cleaner for use on most brands of thermal and violet processed metal plates. It is designed to remove ink, gum glaze and paper. It is also a good desensitizer for sensitive plate areas and scratches. SP-529 is also suitable for use as a cleaner / desensitizer on chrome rollers and metal cylinders.

Product Need and Usage

SP-529 Plate Cleaner / Desensitizer can be used as a general purpose cleaner on both sheetfed and web presses. Modern CTP plates may become sensitive due to wear from friction, build-up of contaminants, and damage in handling. SP-529 will clean and desensitize plates from all of these sources.

Features

- * Fast acting alkaline cleaner.
- * Strong desensitizer and scratch remover.
- * Excellent cleaner and desensitizer.
- * Multipurpose for plates, chrome rollers and impression cylinders.

Directions

Sheetfed Presses: Use when the press is stopped. Saturate a water-dampened cloth or sponge with SP-529 Plate Cleaner / Desensitizer. Apply to surfaces to be cleaned, then wipe off with a clean, dampened cloth.

Web Presses: Follow the same procedure as with sheetfed. For emergency clean-up, SP-529 may be applied directly to the plate with a spray bottle while the press is running.

Technical Specifications

Flash Point (°F TCC)	>200
VOC (lb/gal method 24)	0.34
Specific Gravity	1.03
Water-Miscible	Yes
Color	Colorless
Odor/Fragrance	Mild Solvent
