

SP-535 Drying Retarder

Ink Train Coating Retarder

Description

SP-535 is used to prevent coating from drying in an ink train applicator.

Directions

With the press in idle, apply a small amount of SP-535 to the ink train coating using a trigger spray applicator. Allow to run in for a short time and turn press off.

Product Need and Usage

Due to the increased exposure to air of aqueous coating applied from an ink train. The coating will dry on the rollers if allowed to sit. The SP-535 is applied to the rollers to prevent drying prior to use on the next job.

Features

- * Prevents drying of ink train coating.
- * Eliminates need to wash roller after every job.
- * Supplied with convenient trigger sprayer.
- * Odorless formula.
- * Non-combustible.

Technical Specifications

Flash Point (° F TCC)	>200
VOC (lb/gal method 24)	8.70
Specific Gravity	1.045
Water-Miscible	Yes
Color	Pale
Odor/Fragrance	Mild
