

N-4000

SCAQMD Rule 1171 Wash

Description

Nova N-4000 is a one of a kind ultra low VOC press wash. It contains less than 100 g/l VOC and no vegetable or mineral oil based components. N-4000 will thoroughly and quickly rinse with water, leaving no oily residue on blankets or rollers. N-4000 utilizes VOC exempt solvents formulated in a user-friendly stable emulsion that is easy to use and leaves blankets and roller totally clean.

Product Need and Usage

N-4000 meets the requirements for 2009 SCAQMD Rule 1171. It is also recommended for the printer trying to achieve "GREEN" status or needing to reduce VOCs for air permitting. N-4000 is suitable for use by hand application for sheetfed and web presses. It will also clean UV ink and is compatible with UV rubber compounds. The key advantage is NO OILY RESIDUE.

Directions

Blankets: Apply with shop cloth and wipe to remove ink and piling. Follow with a water-dampened cloth to remove all residue.

Rollers: Apply N-4000 to top roller and allow to circulate. Engage wash up blade and repeat small applications. Finish with a few applications of water. Not recommended for automatic blanket and roller wash systems. For automatic systems use Nova N-478 and N-472 Rinse Away.

Features

- * SCAQMD Rule 1171 compliant.
- * Works on sheetfed and web presses.
- * Works on conventional and UV ink.
- * Contains no vegetable or mineral oil based material.
- * Non-flammable, contains no acetone.
- * User-friendly micro-emulsion cleaning power.

Technical Specifications

Drying Speed	Medium
Water-Miscible	Yes
Flash Point (°F TCC)	110
VOC (lb/gal method 24)	0.78
Vapor Pressure (mm HG)	4
Odor/Fragrance	Solvent
