

N-441 Uni-Versal Wash

Rule 1171 Wash for UV and Conventional Ink

Description

N-441 Uni-Versal Wash is an SCAQMD Rule 1171 compliant wash for UV, conventional and hybrid inks. It is suitable for use on sheetfed, heatset web and coldset web presses. The special blend of low VOC components, solvents and surfactants makes N-441 a universal solvent recommended for manual wash-up on blankets and rollers on all press types.

Directions

Blankets: Apply a conservative amount of wash with a cloth wiper to remove the ink and blanket piling. Wipe clean with a water-dampened cloth. For newspapers, dilute first with 3-4 parts water.
Rollers: Apply small amounts to one half of the roller train at a time. Alternate sides and repeat until the ink is removed. Rinse well with water or for best results, use Nova N-472 Rinse-Away.

Product Need and Usage

Cleaning UV is especially difficult for a Rule 1171 wash. N-441 Uni-Versal wash is formulated for UV but does an equally good job on conventional ink. For newspaper presses, N-441 Uni-Versal Wash may be diluted with 3-4 parts water for cleaning blankets for great economy.

Features

- * SCAQMD Rule 1171 compliant, less than 100 g/l VOC.
- * Uni-Versal -- one wash for UV and conventional.
- * For use on sheetfed and web presses.
- * Excellent rinsability, no oily residue.

Technical Specifications

Drying Speed	Slow
Water-Miscible	Yes
Flash Point (°F TCC)	185
VOC (lb/gal method 24)	0.86
Vapor Pressure (mm HG)	0.1
Odor/Fragrance	Mild Citrus
