

SP-120

Glaze Remover

Description

Nova SP-120 is a specially formulated solvent designed to remove the most stubborn glaze deposits that tend to build up on blankets and press roller trains. It has been formulated without methylene chloride to qualify under new safety standards. SP-120 penetrates deep into the rubber surface and removes or dislodges the various types of glaze buildup. The rollers and blankets are restored to their velvety texture after being treated with SP-120.

Product Need and Usage

SP-120 is recommended for use on a periodic basis to deep clean and maintain rollers and blankets in good condition. It is not intended for regular use as a blanket and roller wash.

Directions

Blankets: Saturate a rag with SP-120 and clean blanket with back and forth motion. Wipe clean with a clean rag.

Rollers: Apply SP-120 to the top roller and allow wash to work for a few minutes. Engage the wash-up blade and continue to apply small portions to the rollers until clean.

Features

- * Fast-acting; removes stubborn glaze quickly.
- * Strong solvent power for deep cleaning.
- * Quick drying; dries fast with no oily residue.
- * Contains no methylene chloride.
- * Economical.
- * Large quantities can be stored with no additional insurance liabilities.

Technical Specifications

Flash Point (°F TCC)	10
VOC (lb/gal method 24)	5.40
Specific Gravity	0.77
Water-Miscible	No
Color	Colorless
Odor/Fragrance	Strong / Sweet
