

SP-130LVT

Metering Roller Cleaner

Description

Nova SP-130LVT is a specially formulated metering roller cleaner designed to have a VOC composite vapor pressure less than 10 mmHG. The special blend is fast drying and compatible with dampening roller compounds.

Directions

Metering Roller: Disengage the metering roller from contact with other rollers and wipe clean with a cloth saturated with SP-130LVT. The metering roller should be cleaned daily at the end of the shift or when ever a build-up of ink appears.

Product Need and Usage

Continuous dampening systems depend on the smooth surface of the metering roller to ensure uniform dampening of the plate and to prevent streaking in the solids and screens. SP-130LVT is ideal for cleaning all rollers in the dampening system, leaving them clean and free of any ink or resin build-up that can promote ink feedback into the dampening system.

Features

- * VOC composite vapor pressure < 10 mmHG.
- * Fast-drying.
- * Compatible with dampening roller compounds.
- * Reduced VOC.

Technical Specifications

Flash Point (°F TCC)	10
VOC (lb/gal method 24)	5.14
Specific Gravity	0.78
Water-Miscible	Yes
Color	Colorless
Odor/Fragrance	Medium / Sweet
